

# **TR 400 - Final Assessment of Industrial Training (Online Viva)**

## **E/15 CP, CE, CO, EE, ME & PR**

### **Guidelines for the Students**

Each student should make a presentation on his/ her industrial training to a panel consisting of a practicing engineer from the Industry, a representative from the NAITA and two lecturers each from the relevant Department and the ITCGU. There will be a questions and answer session based on the both training sessions.

- Time allocation

10 minutes for the presentation + 10 minutes for Questions and Answers

- Expected content in the power point presentation

- ✓ Brief Introduction to the training session including training assignment, nature of the organization/work site/project/ factory etc. and the work that you engaged there.
- ✓ Description on the work carried out/ observed/learnt during the training period including the situations where you could apply the theoretical knowledge gained at the faculty, additional knowledge you could gain through training, practical issues and solutions, industrial safety and health, quality assurance practices etc.
- ✓ Brief account on the industrial exposure that you could ultimately gain/ acquire through industrial training

- Evaluation

Technical content/knowledge, Quality of slides, Presentation skills and Time management will be the major aspects considered in the evaluation.

- Viva Schedule

Schedule will be notified in FEeLS.
